 4. **Vania Christian / 36**

SOAL

Diketahui kubus $ABCD.EFGH$ dengan panjang rusuk 8 cm. Buktikan bahwa garis GC tegak lurus dengan garis BD .

1

Ketegaklurusan
dua garis

JAWABAN

$$\left. \begin{array}{l} GC \perp DC \\ GC \perp BC \end{array} \right\} GC \perp ABCD$$

$$\therefore GC \perp BD$$

TERBUKTI

SOAL

Jika kubus tersebut memiliki panjang sisi 6 cm, tentukan jarak antara titik G dan A!

JAWABAN

2.

$$\begin{aligned}AC^2 &= AB^2 + BC^2 \\ &= 6^2 + 6^2 \\ &= 36 + 36 \\ &= 72\end{aligned}$$

$$AC = 6\sqrt{2} \text{ cm}$$

$$\begin{aligned}AG^2 &= AC^2 + CG^2 \\ &= (6\sqrt{2})^2 + 6^2 \\ &= 72 + 36 \\ &= 108\end{aligned}$$

$$AG = \underline{\underline{6\sqrt{3} \text{ cm}}}$$

SOAL

Tentukan jarak dari titik H ke diagonal AC jika panjang rusuk kubus 15 cm

JAWABAN

$\triangle ACH$ merupakan \triangle sama sisi

$$\frac{1}{2} \cdot AC \cdot HH' = \frac{1}{2} \cdot AH \cdot HC \cdot \sin \angle AHC$$

$$\frac{1}{2} \cdot 15\sqrt{2} \cdot HH' = \frac{1}{2} \cdot 15\sqrt{2} \cdot 15\sqrt{2} \cdot \sin 60^\circ$$

$$HH' = \underline{\underline{\frac{15}{2}\sqrt{2} \text{ cm}}}}$$

SOAL

Sebuah balok $KLMN.OPQR$ memiliki panjang 15 cm, lebar 12, dan tinggi 10 cm. Tentukan jarak antara titik K ke bidang $LMPQ$!

JAWABAN

4. 0
K 15 cm
Proyeksi titik K ke bidang LMPQ
adalah titik L, sehingga
Jarak K ke bidang LMPQ
sama dengan panjang KL.

$$KL = 15 \text{ cm}$$

\therefore Jarak K ke bidang LMPQ
adalah 15 cm.

5

Jarak 2 garis
sejajar

SOAL

Jika kubus tersebut memiliki rusuk 12 cm, tentukan jarak antara garis AH dan garis BG

JAWABAN

Proyeksi titik A dan H di bidang BCGF adalah titik B dan G sehingga jarak AH ke BCG sama dengan panjang AB atau HG.

$$\begin{aligned}\therefore \text{Jarak AH ke BCG} \\ &= AB \\ &= 12 \text{ cm} \\ &= \underline{\underline{12 \text{ cm}}}\end{aligned}$$

SOAL

Jika kubus tersebut memiliki panjang sisi 5 cm, tentukan jarak antara garis **BD** dan **EG**!

JAWABAN

BD terletak di bidang BDHF
EG terletak di bidang ACEG

BDHF memotong ACEG di S_1S_2

\therefore Jarak BD dan EG = S_1S_2
= 5 cm

SOAL

Pada kubus $ABCD.EFGH$ dengan panjang rusuk 10 cm, tentukan panjang proyeksi garis AG pada garis BD .

JAWABAN

AG terletak di bidang ACEG
BD terletak di bidang BDHF

ACEG memotong BDHF di S_1

$$\frac{1}{2} \cdot AG \cdot TS_1 = \frac{1}{2} \cdot AC \cdot CG$$

$$\frac{1}{2} \cdot 10\sqrt{2} \cdot TS_1 = \frac{1}{2} \cdot 10\sqrt{2} \cdot 10$$

$$\therefore TS_1 = \underline{\underline{\frac{10}{\sqrt{2}} \text{ cm}}}$$

SOAL

Diketahui sebuah kubus $ABCD.EFGH$, dengan panjang rusuk = 6 cm. Berapa panjang proyeksi CF pada bidang $ACGE$?

JAWABAN

Proyeksi titik F ke bidang ACEG adalah titik E.

Sehingga,

∴ Panjang proyeksi FC di bidang ACEG adalah panjang $EC = \underline{\underline{6\sqrt{3} \text{ cm}}}$

THANKYOU
